Farm4all®

Management of the entire fish production process

Liberali®

Farm4all®

PISCICULTURE

Farm4all

The Farm4all® Pisciculture solution manages the entire fish production process, recording the notes of locations, rations and species, biometric control, reports for analysis and results per batch.

Provides transparency in the control and use of resources necessary for the activity of fish farming, such as the use of machinery, labor, feed, medicines and zootechnical information.

Main notes:

- Feeding
- Biometry
- Estimation of Fishing Result
- Fishing Result
- Medication
- Death
- Population
- Weight Gain
- Daily Log of Occurrences
- Reform and Construction of Tanks
- Climate Records
- Operations
